*Additional information or comments to “International collaboration”*

**In regards to the table in A.5.1:**

All our research projects have international collaboration in some form, but not all investigations and papers involve scientists from abroad.

Only guests with salary from their home institution, staying more than 1 month at CBC, are counted. Similarly, only personnel with CBC funding visiting other institutions are counted. Counting all researchers from abroad, working more than one month in total at CBC, regardless of funding (and not employed as PhD students), yields totally different numbers:

	Percentage of people-years by foreign researchers at CBC	Amount of female people-years among the foreign researchers at CBC
2007	30%	54%
2008	37%	17%
2009	48%	23%
